

Runwise User Guide

Runwise is a free collection of running calculators. No account required.

Getting Started

Open [runwise](/) in any browser. The home page lists all six tools — click any card to open it.

Tools

Pace Calculator — `/pace`

Convert between the three common pace formats. Enter a value in any field and the other two update instantly.

Editable inputs (any one updates the other two):

Read-only outputs (update automatically):

Each read-only output has a copy-to-clipboard button.

Race Time Predictor — `/race-predictor`

Predict your finish time for a half marathon or marathon from a recent race result.

Inputs:

- Recent race distance (e.g. 10K)
- Recent race time

Output: Predicted half marathon and marathon finish times using the Riegel formula.

Training Paces — `/training-paces`

Generate a full set of training paces from a recent race result.

Inputs:

- Recent race distance
- Recent race time

Output: Easy, marathon, threshold, interval, and repetition paces.

HR Zone Calculator — `/hr-zones`

Calculate your five heart rate training zones.

Inputs:

- Maximum heart rate (or age for estimated max HR)
- Resting heart rate (optional — used for Karvonen formula)

Output: HR ranges for zones 1–5.

VO2 Max Estimator — `/vo2max`

Estimate your aerobic fitness level from a race performance.

Inputs:

- Race distance
- Race time

Output: Estimated VO2 max (ml/kg/min) and fitness category.

Parkrun Predictor — `/parkrun`

Predict your 5K parkrun time from recent training or racing.

Inputs:

- Recent race distance
- Recent race time

Output: Predicted 5K finish time.

Tips

- All calculators work on mobile — tap any input field and your keyboard will appear.
 - Results update as you type; no submit button required.
 - Use the navigation bar at the top to switch between tools without going back to the home page.
-

Dark Mode

Runwise respects your device's dark/light mode setting automatically.
